SLT-O27 Origami Ornaments & Planter	
<p>Enjoy two ornaments & painted planter created by Mrs. Quenneville. This origami ornament represents a symbol of how special you are and what you have come to mean in the life of the person that gave it to you. It has been constructed from 12 square pieces of paper that were carefully folded into 12 parallelograms. The parallelograms were then folded into springs that could be neatly tucked into the pockets of one another to create 4 walking pyramids. Each of the legs of the 4 pyramids were then neatly tucked into the pocket of another pyramid until all of the points and pockets were secure and the dodecahedron was complete. A string was then tied for support and display before careful attention was paid to the faces of the sculpture. Here is where layers and layers of tissue paper were painted to further add strength and support, beauty and care. The overall result is a representation of patience, problem solving, navigation, craftsmanship and dedication. Each fold, tuck, and layer a symbol of affection and gratitude for your kindness and compassion.</p>
